

# ECONOMILL

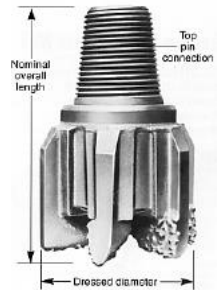

## DESCRIPTION

The Economill is an effective tool for milling up packers, retainers, bridge plugs or cement, or for any similar light-duty milling jobs.

Economill is also used in the Skirted Junk Mill assembly to clean up and disengage a top of fish.

The Skirted Mill is the assembly of a Wahsover Top Sub with an internal connection for the Economill. And dressed with a Washover Shoe screwed to the Top Sub around the Economill.

Blades of the tool are dressed with crushed carbide, but can be also dressed with inserts.
