

SHOCK TOOL

Other name : Shock Absorber, Shock Sub

DESCRIPTION

An hydraulic spring absorbs deflections minimizing the variations of the bit load and reducing vibrations in the drill string..

It enhances bit life, reduces the rig equipment damages, the drill string damages and increases the penetration rates by minimizing the shocks and vibrations in the drill string.

USE

It is positioned as close as possible above the bit.

STANDARD SPECIFICATIONS

Outside Diameter	4-3/4"	6-1/4"	7-3/4"
Connection	3-1/2" IF	4-1/2" IF	6-5/8" REG
Max Overpull Up/Down	60 000 lbs	78 000 lbs	110 000 lbs
